Node.js Web API

Overview of Content

Welcome to the 1st topic of the **Full Stack Secured Development** competency unit. In this topic, you will dive into Node.js backend development for full stack web applications, explore creating RESTful web APIs, work with Express.js, and discover useful Node.js packages.

Lecture Slides: Topic 1 Node.js Web API

Learning Outcomes:

1. Explain the role of Node.js in Full Stack Development.
2. Define what a RESTful API is.
3. Discuss how to use Express.js for building web APIs.
4. Outline some useful packages.

Select each heading to learn more.

1.1 Node.js

Lab Activities

You will need to complete the following:

Lab 1 Node.js Web API

PRACTICE

Lab 1 Node.js Web API

Lab 1 Submission

Additional Resources

To succeed in this topic, you will have access to various resources, including:

- Learn Node.js https://nodejs.dev/en/learn/
- MDN Express.js Guide https://developer.mozilla.org/en-US/docs/Learn/Server-side/Express_Nodejs

Discussion Forum

Take some time to reflect on your learning journey so far.

- What key takeaways did you receive?
- What questions do you have about the content?

Post your thoughts and questions in the discussion forum and share your learning journey with all of us.

While you will not be penalised for what you post in the discussion forum, bonus points will be given for active participation.
